PROJECT

- **Title** : Design and Implementation of IOT Based Agricultural Greenhouse Control System
- **Software Used** : Windows 10 Operating System, Arduino IDE, Adafruit.
- **Hardware Used** : Temperature Sensor, Soil Moisture Sensor, Humidity Sensor, LCD Display, Microcontroller Unit.

➤ **Description:**

Agriculture plays a vital role in the development of agricultural country. In India about 70% of population depends upon farming. Issues concerning agriculture have been always hindering the development of the country. The only solution to this problem is smart agriculture by modernizing the current traditional methods of agriculture. Green house control System is the technical approach in which the farmers in the rural areas will be benefitted by automatic control of greenhouse environment. It replaces the direct supervision of the human. Hence the project helps farmer to control agricultural green house from remote locations.
